

NEW

The CM10 lift has been designed to raise vehicles rapidly and also to permit the user to work upright.

The CM10 lift is ideal even for tyre-shops, mechanical repairing, and many other uses.

An electrohydraulic command unit allows the user to raise and lower the lift staying close to the vehicle in order to position and regulate the rubber pads on the adjustable arms.

NEW

The CM 10 is equipped with a mechanical safety mechanism.

Thanks to its characteristics: reduced dimensions when closed (only 10 cm), maximum height of 1340 and its thin and elegant shape , the CM 10 lift can be positioned under any kind of vehicle.

Adjustable arms, with automatic opening and closing, allow the quick positioning of all types of automobiles, from the smallest one to even commercial vehicles up to 3000kg
